

BLANCSHOOTER

A hair care brand that strengthens the scalp and hair

<https://www.akshooter.com/>

 **KUSTOGEN**

Company Introduction

The letters 'Blanc' in the term Blancshooter, the cosmetics brand for Kustogen Inc., means white in French and the word 'shooter' means problem solver in English. Combined, they make the name for the brand.

We Kustogen created the brand name 'Blancshooter' to promote the corporate image of a company endeavoring to produce cosmetics that can solve all troubles as the 'shooter' for all the scalp troubles as well as the maintenance of black hair by suppressing the creation of white hair.

There are a number of reasons for scalp troubles and white hair generation. We assure you that we are the company that endeavors to produce the best hair cosmetics by identifying raw materials for cosmetics prohibiting white hair generation through multiple testing on the regulatory materials for the causative agents conducted by CEO himself and his research team.

CEO Lee Seung Tae
(A professor in the Department of Applied Animal Science at Kangwon National University)

BLANC + SHOOTER

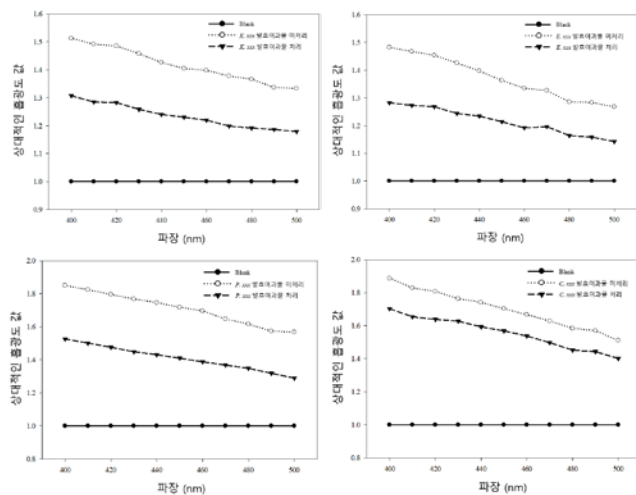

Meaning of 'white' in French

Meaning of 'solver' in English

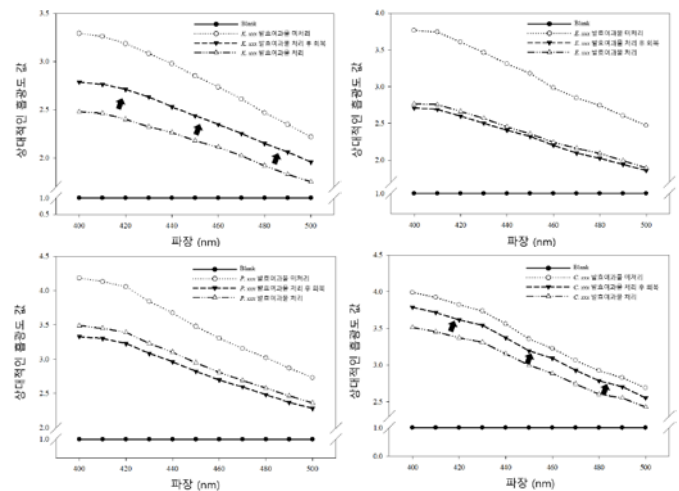

Why Do White Hairs Appear?

Were you aware that microorganisms also live on the scalp? The scalp harbors microorganisms that can contribute to hair aging. Through numerous experiments, Blanceter identified the microorganisms responsible for white hair. The metabolism substances of these microorganisms serve as the trigger for inhibiting melanin production in the melanocytes of hair follicles, leading to the whitening of black hair.

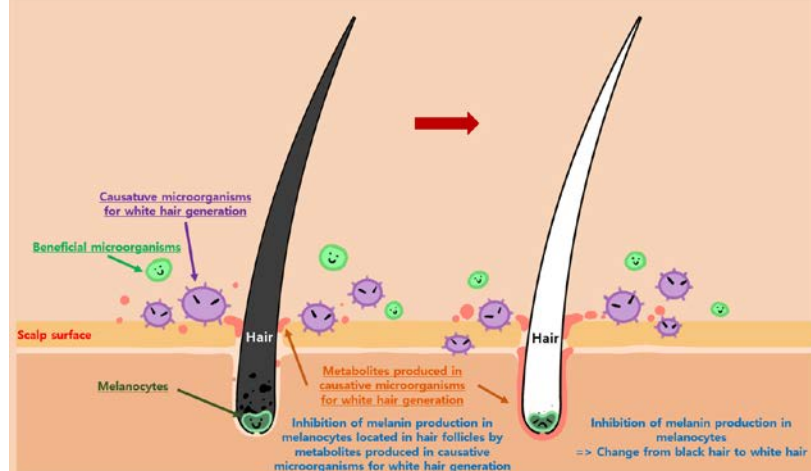

Confirmation of the Inhibitory Effect on Melanin Production by Processing Metabolites of Microorganisms Responsible for White Hair Induction

Confirmation of Melanin Production Recovery in the Absence of Treatment with Metabolites of Microorganisms Responsible for White Hair Induction.

The Mechanism of White Hair Generation by Scalp Microorganisms

What are the Functions of Blancshooter's Core Ingredients?

Blancshooter's core ingredients can effectively remove microorganisms that are the cause of new white hair generation within the scalp, while simultaneously promoting the effective maintenance of scalp microorganisms to support the retention of black hair.

업체명: 주식회사 커스토젠 접수일자: 2023. 04. 01

대표자: 이 승 태 시험완료일자: 2023. 06. 29

주소: 강원도 춘천시 강원대학길 1 동문생명과학대학 2호관 116호

시험명: 헤어팩

시험항목	검사항목	검사항과	판정
화이트 모발 산양 양성 억제 테스트	*비교 참고	96 %	유

시험 방법, 30일동안 '헤어팩을' 화이트 모발이 제거된 후피에 사용함 후, 화이트 모발이 제거된 후피에서 새롭게 성장한 모발의 색을 육안으로 확인해 본다. 피험자들은 시험기간내에 헤어 컷을 하지 않았으며, 1cm 정도 이하의 길이를 가진 모발을 산양 양성 모발로 간주해왔다. 산양 양성 모발의 화이트 모발은 볼록 부분을 육안 확인하였다. 화이트 모발 제거가 이루어진 뒤의 영역 내 산양 양성 모발 가운데 화이트 모발 없이 볼록 모발만 존재하는 경우는 성공으로 판정하였고, 화이트 모발이 한 가닥이라도 존재하는 경우는 실패로 판정 하였다.

Test Results			
Test Name	Inspection Criteria	Inspection Results	Judgment
Test for suppressing white hair generation	*Note Remarks	96 %	Success

Test Method: After using the hair pack on the scalp from which white hair had been removed for 30 days, the color of newly grown hair on the scalp from which white hair had been removed was visually confirmed. The subjects did not cut their hair during the test period, and hair with a length of less than 1 cm was considered newly generated hair. The white or black color of the newly generated hair was visually confirmed. If only black hair was present without white hair among the newly generated hairs in the scalp area where white hair was removed, it was judged as success, and if even a single strand of white hair was present, it was judged as failure.

'Blancshooter' Recommends the Following Individuals.

- Individuals concerned about increasing white hair
- Individuals troubled by scalp issues
- Individuals bothered by dandruff
- Individuals experiencing scalp itchiness
- Individuals worried about hair health due to frequent coloring and perming
- Individuals with thin and weak hair strands
- Individuals troubled by hair loss

Blancshooter Hair Pack

BLANCSHOOTER

The unique and powerful scalp microbial ecosystem balance control function of Blancshooter Hair Pack

'Blancshooter Hair Pack' is a hair care product designed to effectively eliminate microorganisms responsible for the new formation of white hair within the scalp. Simultaneously, it contains high concentrations of functional ingredients that can promote the maintenance of scalp microorganisms, aiding in the preservation of black hair.

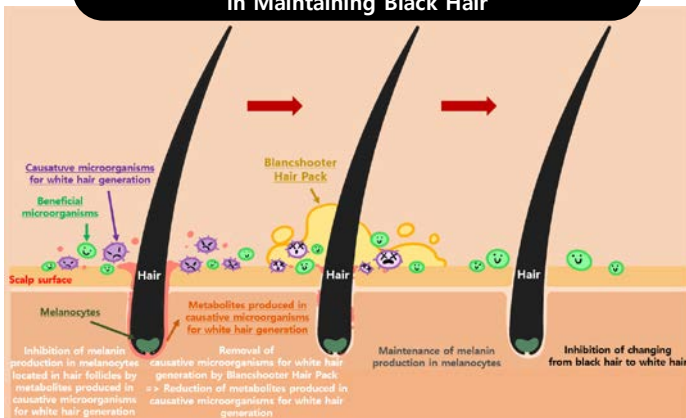

Containing powerful components for regulating the balance of the scalp microbial ecosystem, promoting the establishment of a healthy scalp microbiome.

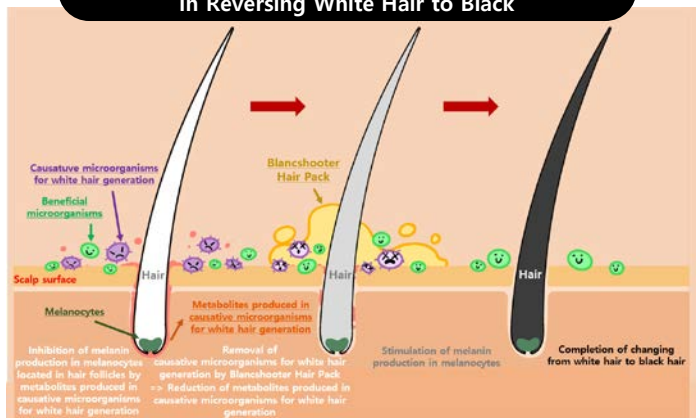

Performance Story of Blancshooter Hair Pack

- Point 1. Elimination of microorganisms causing white hair
- Point 2. Inhibition of the proliferation ability of microorganisms causing white hair
- Point 3. Maintenance of beneficial microorganisms on the scalp

The Performance Story of Blancshooter Hair Pack in Maintaining Black Hair

The Performance Story of Blancshooter Hair Pack in Reversing White Hair to Black

Primary Efficacy

Maintenance of Black Hair

Inhibition of New White Hair Generation

Restoration of Hair Health

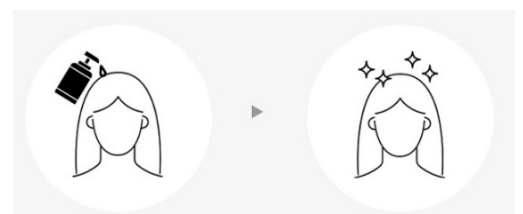

Restoration of Scalp Health

Maintenance of Balance in the Scalp Microbial Ecosystem

How to Use

- After using "Blancshooter Shampoo", take an appropriate amount of the hair pack on the palm.
- Evenly apply the dispensed "Blancshooter Hair Pack" to the scalp.
- Massage thoroughly for approximately 5 minutes, and wash it off with water

Blancshooter Shampoo

BLANCSSHOOTER

When used in combination with Blancshooter Hair Pack, the effectiveness is doubled.

Blancshooter Shampoo is a hair care product that can effectively remove scalp sebum, which serves as nutrition for the microorganisms involved in white hair generation. Simultaneously, it contains scalp-cleansing agents that can efficiently eliminate microorganisms that hinder scalp health and cleanliness.

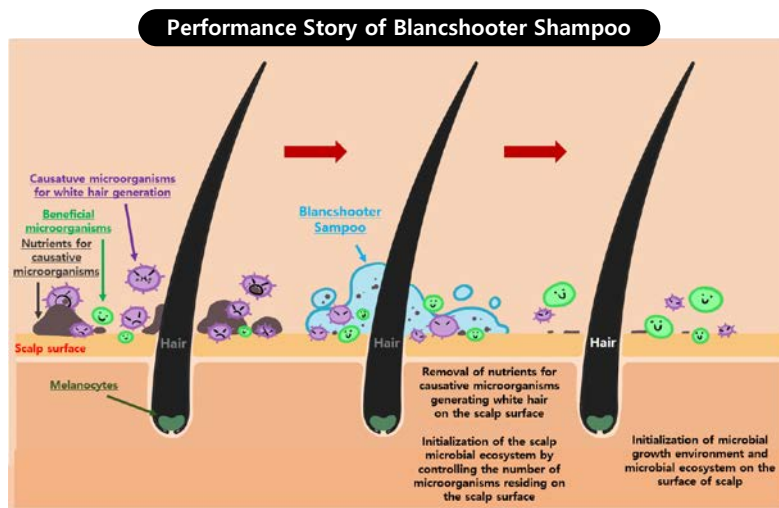

Blancshooter Shampoo is specialized in resetting the scalp microbial ecosystem with its powerful scalp-cleansing agents.

Performance Story of Blancshooter Shampoo

2. Dispense an appropriate amount of Blancshooter Shampoo onto your palm and lather it.
3. Gently massage your scalp and hair, and then rinse thoroughly with lukewarm water

Blancshooter Shampoo & Hair Pack

BLANCSHOOTER

We're here to address your curiosity.

Q. Is it okay to use Blancshooter Hair Pack with shampoos from other brands besides Blancshooter Shampoo?

A. Using other shampoo products will not diminish the effectiveness of Blancshooter Hair Pack. However, Blancshooter Shampoo ingredients are crucial for improving the scalp environment, which is essential for the seamless maintenance of Blancshooter Hair Pack functionality. Therefore, there is a synergistic effect in enhancing the performance of Blancshooter Hair Pack. In other words, it's akin to preparing a field or plot of land to be suitable for cultivation before embarking on full-scale farming. Accordingly, for even more potent inhibition of new white hair generation, we highly recommend the combined use of Blancshooter Shampoo and Blancshooter Hair Pack.

Q. Will there be any issues with scalp health if Blancshooter Hair Pack residue remains on the scalp?

A. The ingredients in Blancshooter Hair Pack are non-irritating to the skin, and this has been verified through skin irritation tests by accredited institutions, confirming no irritation at all. Furthermore, the core ingredients in Blancshooter Hair Pack are food-grade materials, ensuring their safety has been validated. Therefore, even if residues are present on the scalp, they will not have any impact on scalp health.

Q. I am someone who worries about developing white hair at a young age due to a family history. Can 'Blancshooter' products help alleviate my concerns?

A. If you live closely with parents who have a lot of white hair, there is a higher chance of sharing the microorganisms responsible for white hair that reside on their scalp. As a result, the probability of developing white hair at a young age increases, and once white hair appears, the likelihood of rapid graying also rises. However, effective removal of these microorganisms that induce white hair can significantly reduce the probability of such occurrences. Therefore, using 'Blancshooter' products can significantly reduce the presence of microorganisms that cause white hair on the scalp, effectively preventing the onset and rapid progression of graying.

Q. Is there a way to see the effects of 'Blancshooter' products quickly?

A. 'Blancshooter' products have the function of significantly preventing the new generation of white hair by reducing the microorganisms that induce white hair. Therefore, using this product while removing existing white hair allows you to address concerns about the rapid onset and increase of new gray hairs within a short period.

Blancshooter Shampoo & Hair Pack

We're here to address your curiosity.

BLANCSHOOTER

Q. Can existing white hair be transformed into black hair by using 'Blancshooter' products?

A. Long-established white hair, especially in middle-aged and elderly individuals, has melanocytes within the hair follicle that have aged and are no longer responsive to external stimuli, resulting in a cessation of melanin production in these cells. Therefore, despite the removal of white hair-inducing microorganisms through the use of 'Blancshooter' products, significant improvement in long-established white hair is challenging. However, since no additional white hair is expected to occur after using 'Blancshooter' products, the progression of graying in the hair will be halted. In cases where white hair has recently formed, especially in younger individuals, reducing white hair-inducing microorganisms can prevent the aging progression of melanocytes within the hair follicles. This, in turn, may induce a transformation back to black hair.

Q. 'Blancshooter' products can remove new gray hairs due to what reasons?

A. People typically lose 10-15, and sometimes more than 30, hairs a day, which are then replaced by new ones. This process occurs repeatedly, leading to hair renewal and maintenance. White hairs, too, fall out in a similar manner. 'Blancshooter' products prevent the future generation of white hair at its source. After using this product, there is no occurrence of new white hair, and existing white hairs are naturally removed. This contributes to the overall transition of hair to a black state.

Q. What are the additional functions of the 'Blancshooter' product?

A. Individuals who have used the 'Blancshooter' product in our own clinical tests have reported improvements in various scalp-related symptoms, such as relief from skin itching, resolution of scalp issues like pimples, improvement in dandruff, increased hair thickness, and an increase in the occurrence of baby hair. However, scientific validation of the underlying causes has not yet been conducted. 'Blancshooter' product can regulate the essential ecosystem for controlling scalp microorganisms, and the modulation of the scalp microorganism ecosystem caused by 'Blancshooter' is believed to influence various forms of scalp-related issues, including those not scientifically confirmed."

AKShooter

Skin Microbiome Control Cosmetic Brand

<https://www.akshooter.com/>

 **KUSTOGEN**

Company Introduction

KUSTOGEN coined the brand name Akshooter which stands for AK (Akne, meaning acne) + Shooter (fixer) in German. It means we are trying to solve all skin breakout issues, including acne.

Skin breakouts are due to various causes, including microbes, hormones, one's health, and lifestyle. Together, our CEO and other researchers studied on ingredients to inhibit influences from such causes to develop breakout control cosmetic ingredients.

We are confident to call us to do our best to create useful cosmetics for skin and put our heart into our brand name to appeal.

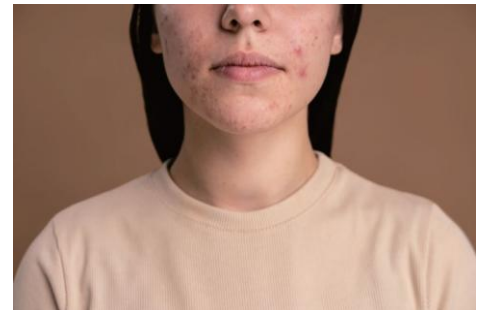

CEO Seungtae Lee
(Professor in the Department of Applied Animal Science at Kangwon Univ.)

Skin breakout?

Akshooter is a cosmetics brand for sensitive skin, but basically for treating acne. Acne and skin breakouts are caused by external factors, hormones, one's health, and lifestyle, and are not easy to solve. Therefore, they require continual care.

Akshooter's products value preventing fundamental causes of acne and skin breakouts. A special ingredient contained only in Akshooter products reduces bacteria that cause skin breakout.

(Derbiome Arkshooter AK-20 cream completed the acne test in early 2022)

What is AK-20?

AK-20 is a complex material developed by KUSTOGEN, consisting of *Lactobacillus paraplantarum* ferment filtrate, nisin, and lysozyme that activate beneficial bacteria and destroy bad bacteria only.

Lactobacillus paraplantarum
Ferment Filtrate

+

Nisin

+

Lysozyme

Give help to your skin!
Patented AK-20 ingredient

Lactobacillus paraplantarum only exists on healthy skin in a woman in her 20s. The *Lactobacillus paraplantarum* ferment filtrate greatly assists in maintaining the balance of skin microbial ecosystem.

The combination of nisin and lysozyme selectively neutralizes the bacteria harmful to the skin.

All cosmetics produced by **Akshooter** contain 'AK-20' that keep natural healthy skin by soothing sensitive skin as well as balancing the skin microbial ecosystem.

Derbiome Akshooter BOOSTING Ampoule

akshooter

Derbiome Akshooter BOOSTING Ampoule is a functional cosmetic in the form of ampoule containing high-concentrated functional material (AK-20) which prevents the growth of harmful bacteria that causes acne and multiple skin troubles and stimulate the survival of beneficial bacteria, resulting in maintaining healthy and clean skin condition.

Also, it contains other multiple functional materials for skin wrinkle improvement, skin moisture maintenance, calming effect for the skin, skin sebum management, skin brightening, skin vitamin provision, and so forth in high concentration.

Derbiome Akshooter BOOSTING Ampoule

'Derbiome Akshooter BOOSTING Ampoule' including a variety of functional materials promoting skin wrinkle improvement, skin moisture maintenance, calming effect for the skin, skin sebum management, and so forth can enable you to have confident skin the next day by becoming energized to go on with your daily life.

Revive Your Inner Light.

Hwido

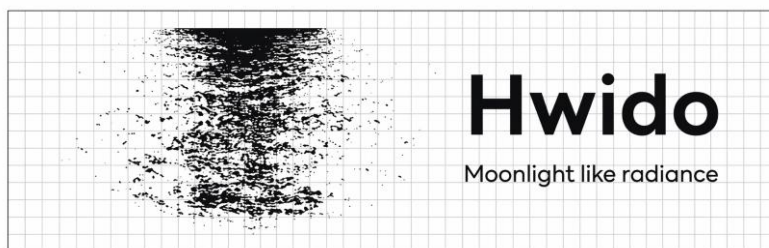

Company Introduction

Hwido is a skincare brand centered on high-purity PDRN, developed to support intensive skin regeneration and recovery through scientifically advanced formulations. Believing that healthy skin begins with effective restoration rather than temporary care, Hwido focuses on improving damaged skin conditions while selected products are further enhanced with microbiome care to help maintain a balanced and healthy skin environment.

CEO Seungtae Lee
(A professor in the Department of Applied Animal Science at Kangwon National University)

Why Does Skin Become Damaged?

- External stress and environmental factors
- Slower skin regeneration
- Weakening of the skin barrier
- Damaged skin loses its ability to recover effectively

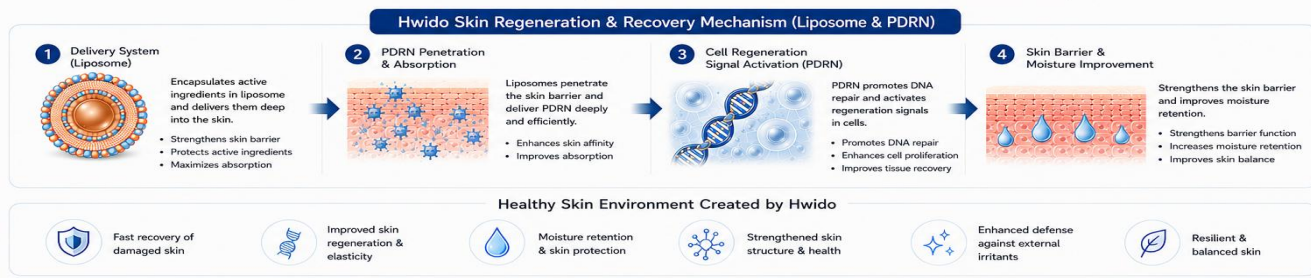

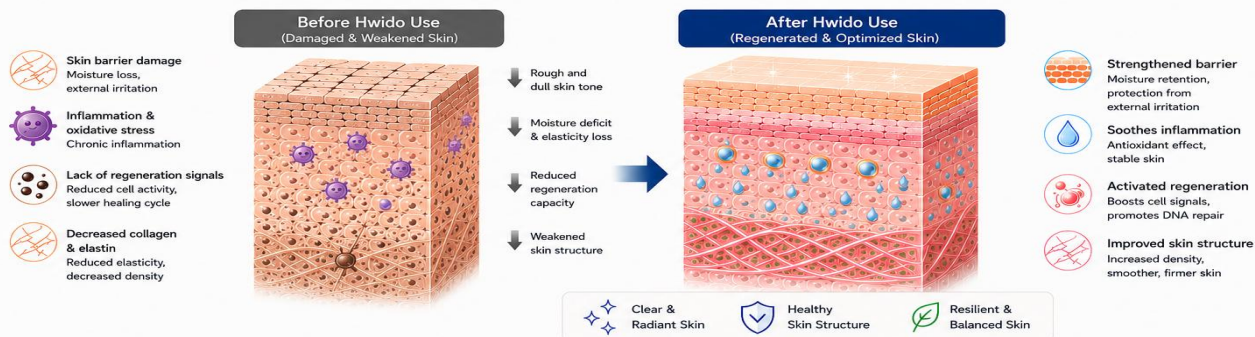

The Key Issue Behind Skin Damage

Reduced skin regeneration is one of the main causes of visible skin concerns

- Slower cell turnover
- Accumulated damage
- Decline in skin vitality

Hwido's Mechanism for Skin Regeneration & Recovery (Liposome & PDRN Focused)

Hwido combines Liposome and PDRN to fundamentally regenerate and recover damaged skin, delivering healthy, clear, and transparent skin.

What are the Functions of Hwido's Core Ingredients? ---

Hwido's core ingredients are designed to promote skin regeneration, improve overall skin tone and radiance, strengthen the skin barrier, provide deep hydration, and help maintain a balanced and healthy skin environment.

01.

Advanced Skin
Recovery with
High-Purity PDRN

02.

Restores Natural
Glow and Skin
Vitality

03.

Balances and
Hydrates for
Healthier-Looking Skin

'Hwido' Recommends the Following Individuals. ---

- Individuals experiencing loss of skin vitality and radiance
- Those seeking a luminous, youthful-looking complexion
- Individuals concerned with early aging and skin fatigue
- Those in need of intensive hydration and skin recovery
- Individuals looking to enhance overall skin condition and balance
- Those who prefer advanced skincare powered by high-purity PDRN

Hwido Ampoule

Advanced Skin Revitalization with High-Purity PDRN

'Hwido' is formulated with high-purity PDRN to support skin recovery, helping restore vitality and resilience.

Enriched with advanced functional ingredients, it delivers deep hydration and promotes a visibly radiant, youthful-looking complexion.

Powered by high-purity PDRN and synergistic active ingredients, it enhances overall skin condition for a healthier, more luminous appearance.

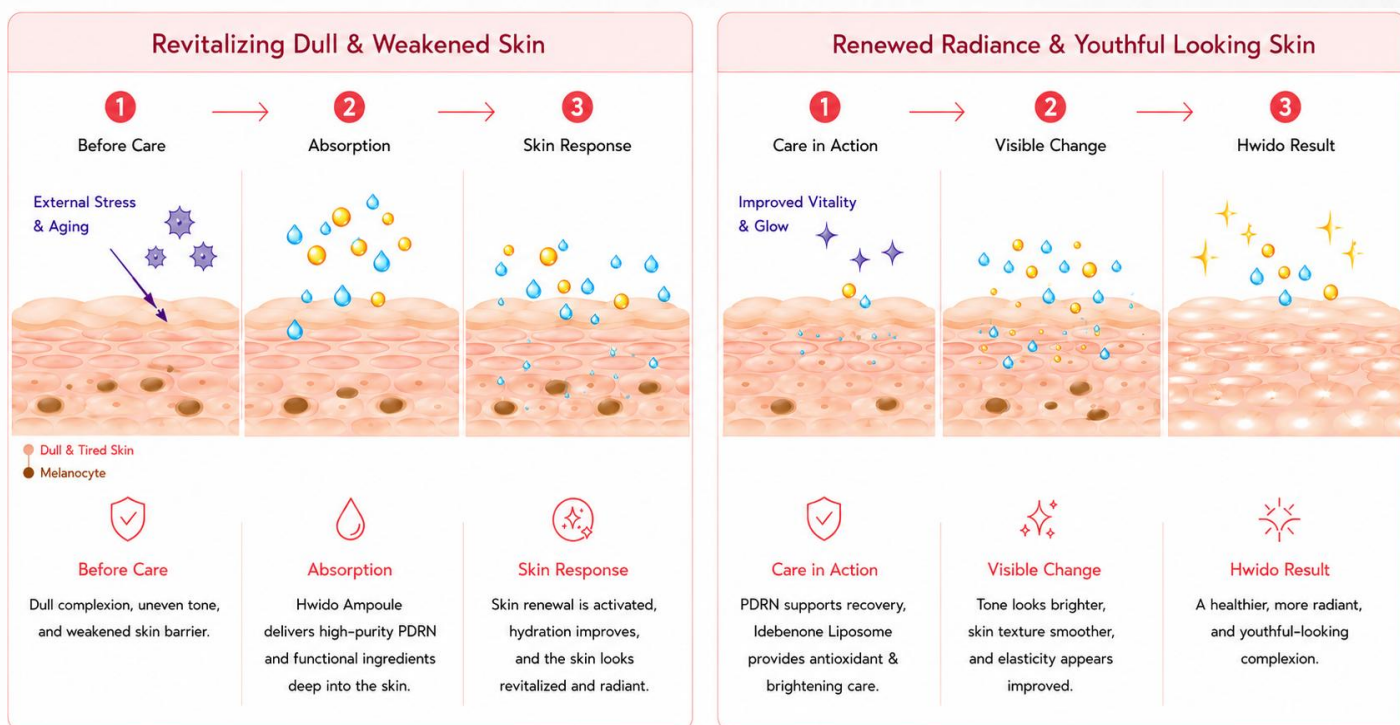

Performance Story of Hwido Ampoule

Point 1. Advanced Skin Revitalization with High-Purity PDRN Core

Point 2. Advanced Antioxidant Brightening Care Powered by Idebenone Liposomes

Point 3. Dual-Functional Revitalization Care for Brighter, Firmer and Smoother-looking Skin

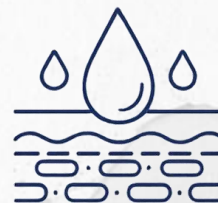

Primary Efficacy

Skin Revitalization

Luminous Complexion

Moisture Retention

How to Use

1. After cleansing, refine the skin with toner.
2. Apply a moderate amount of Hwido ampoule evenly across the face.
3. Gently pat for optimal absorption.

Hwido Semi-Gel Sheet Mask

Hwido Semi-Gel Sheet Mask is designed as a dual-type system to support both intensive skin recovery and long-lasting balance.

Type A, powered by high-purity PDRN, helps revitalize the skin while improving the appearance of elasticity and fine lines.

Type B, focuses on strengthening the skin barrier and restoring balance through microbiome-supporting care, helping to calm and stabilize the skin.

Together this complementary system enhances overall skin condition, leaving the complexion smoother, healthier and well-balanced.

Hwido Mask is designed to deliver targeted skin recovery and barrier balancing care, allowing you to choose the ideal treatment based on your skin condition

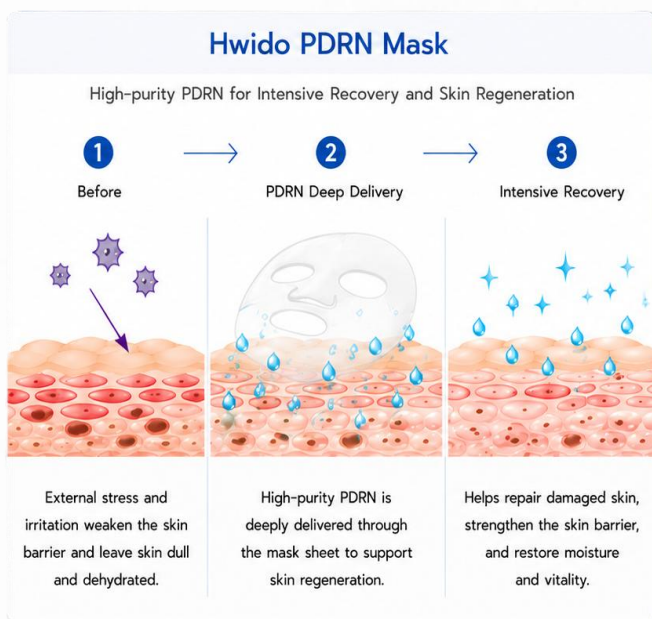

Performance Story of Hwido Mask

Point 1. Supports Skin Barrier Strengthening by Promoting Ceramide Formulation (CE)

Point 2. Moisture-Locking Soothing Formula to Help Prevent Water Loss and Calm the Skin

Point 3. Formulated with EWG Green Grade Ingredients, Suitable for Sensitive Skin

Primary Efficacy

Skin repair & elasticity improvement

Hydration & moisture retention

Microbiome balance & skin barrier support

Brightening & antioxidant effect

How to Use

1. After cleansing, prepare the skin with toner.
2. Select Type A (PDRN Repair) or Type B (Microbiome Balancing) based on your skin needs.
3. Apply the mask evenly to the face.
4. Leave on for 15 ~ 20 minutes.
5. Remove and gently pat the remaining essence to the skin.

Revive Your Inner Light.
